ABOUT ME

As an undergraduate student pursuing an undergraduate degree in statistics, I am on a journey to explore the fascinating world created by data. I do my best to acquire the knowledge and skills needed to leverage the power of data to drive meaningful decisions and innovations. Throughout my academic journey, I received various trainings to deeply understand the basic principles of statistics, programming languages such as Python and R, and machine learning techniques. These trainings not only increased my curiosity for data, but also improved my analytical and problem-solving skills. My passion for data-driven decision-making and my determination to stay current on the latest developments in data science drives me to continually expand my knowledge and capabilities.

WORK EXPERIENCE

SAAT Teknoloji

Artificial Intelligence Software R&D Engineer

[11/2024 – Current]

Projects:

- Content Search Engine**:** Semantic and Word Based Search Engine for OTT platforms
- Content Recommendation Engine**:** Content and Collaborative Based Recommendation ENGINE for OTT platforms
- Contextual Sentiment Analysis with QWEN3 Models: Developed customized sentiment analysis pipelines using LLMs (QWEN3) for context-aware classification
- Data Enrichment & Integration: Implemented API pipelines and relational database operations to enrich metadata and improve downstream model performance

Webtekno.com

Content Editor

[08/2022 – 02/2024]

Shiftdelete.net

Social Media Manager

[02/2017 – 05/2017]

EDUCATION AND TRAINING

Statistics
Mugla Sitki Kocman University [09/2021 – 08/2024]

Management Information Systems
Anadolu University [09/2020 – 01/2024]

Statistics and Computer Science
Cumhuriyet University [09/2019 – 06/2021]

SKILLS

Machine Learning & Model Optimization / Data Analysis & Visualization / Large Language Models (LLMs) / Supervised and Unsupervised Learning / Natural Language Processing (NLP) / Python / PostgreSQL / Containerization & DevOps / R (Programming Language) / API Development / IBM SPSS Statistics / Recommendation Systems Development / Search Algorithms & Information Retrieval / Remote Development & Server Management

PROJECTS

[01/2023 – 02/2024]

Analysis of the performance of translation services and classification algorithms with sentiment analysis

I trained various classification models with supervised learning and performed sentiment analysis on a different data set using these models. Then, I made metric calculations using the scikit-learn library based on the sentiment analysis results to determine the best classification algorithm and translation source.

[11/2023 – 01/2024]

Investigation of the effect of music preferences on the motivation of university students

I conducted Factor analysis, Linear Regression analysis, Chi-square Test and Factor reliability analysis through Jamovi on the data I obtained with the 'Non-Probability Convenient Sampling' method and examined the effect of Music preferences on motivation.

[01/2024 – 03/2024]

Prediction of coronary heart disease using Logistic Regression and Naive Bayes

I performed coronary disease prediction by training Logistic Regression and Naive Bayes models on data from an ongoing cardiovascular study of Massachusetts/framingham residents. At the same time, during the development phase of the model, I used the 'C' parameters to prevent overfitting and the 'solver' parameters to solve the optimization problems of the models.

[04/2024 – 05/2024]

Analysis of variables affecting water quality with SPSS

I analyzed the variables affecting water quality with various statistical analyzes I conducted on water quality data with SPSS. Throughout the analysis process, I used Principal Components Analysis, Factor Analysis, Multidimensional Scaling Analysis, and Non-Hierarchical Clustering Analyzes.

[03/2024 – 05/2024]

Heart Disease Prediction with Classification Algorithms in R Programming Language

I first filled in the missing data with the KNN model on the data related to heart disease in the R programming language. Then, I carried out other pre-processing processes and made predictions on this data with 7 different classification algorithms. I compared the predictions of the algorithms with various metrics.

LANGUAGE SKILLS

Mother tongue(s): Turkish

Other language(s):

English

LISTENING B1 **READING** B1 **WRITING** B1

SPOKEN PRODUCTION A2 **SPOKEN INTERACTION** A2

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

VOLUNTEERING

[2019 – 2021]

IEEE - Computer Society

[2019 – 2021]
Google Developers Groups

[2022 – 2023]
Muğla Data Science Community

COURSES

[11/2024 – 03/2025]
Google Artificial Intelligence and Technology Academy - Data Science Student

[10/2023 – 07/2024]
UPoD Dijital Gelecek Toplulugu - Data Scientist Bootcamp
