SUMMARY

Machine Learning Engineer / Data Scientist with over 2 years of experience building and deploying end-to-end predictive systems, with a strong focus on time series forecasting in financial domains. Proficient in machine learning algorithms such as **LSTM, RNN, XGBoost, and CatBoost**, and skilled in optimizing models for predictive accuracy and performance. and experienced in deploying scalable systems using **Flask**, **GraphQL**, **Docker**, and **Kubernetes**. Strong background in data preprocessing, feature engineering, and evaluation using **scikit-learn, pandas, numpy, TensorFlow**, and **SQL**. Designed and implemented internal **MLOps and AutoML tools** to automate model training and deployment pipelines. While most of my experience lies in the finance domain, I'm eager to apply my skills to **other fields and problem spaces**, and contribute to diverse, impactful machine learning projects.

SKILLS

- **Python** and **SQL** knowledge
- **MySQL**,**PostgreSQL, MongoDB** database systems.
- **Machine learning** frameworks including; **pandas**, **numpy**, **sklearn**, **tensorflow**, **keras.**
- Proficient in building **RESTful** and **GraphQL** services using **Flask**.
- Familiarity with **Kubernetes** and **Docker**
- Skilled in **time series** analysis, forecasting
- Version controlling with **Git** & **GitHub.**
- **Microservices** and **distributed** systems
- **Jira** and **Confluence**
- Familiarity with **AWS**, **Exoscale**
- Proficient in **English**
- **Leadership** and **Teamwork**

WORK EXPERIENCE

Proceedit **Barcelona, Spain (Remote)**
Machine Learning Engineer, Freelancer July 2023 - Present

- Developing a subscription-based product that provides **AI** and **algorithm-driven** trading signals for retail investors, guaranteeing a **minimum of 10% monthly yield** based on backtest results.
- Joined as an intern and transitioned to a full-time Machine Learning Engineer role, tasked with transforming the monolithic Learning Model Builder Engine (LMB) into a **scalable**, **microservice-based architecture**.
- Led the redesign of LMB into **15 microservices**, deployed via **Kubernetes** and **Docker** on **Exoscale Cloud**, resulting in a **30% improvement in prediction accuracy** and a s**ignificant reduction in cloud costs** through efficient resource allocation.
- Implemented features such as **hyperparameter tuning using the Optuna** framework, **advanced error correction techniques for time series models**, and additional model architectures, contributing to the system's **scalability** and **accuracy**.
- Developed the Learning Model Generator (LMG), an **AutoML** tool **automating model development** for different assets and cases, significantly **streamlining processes** for the team.
- **Reduced operational costs** by implementing dynamic creation and deletion of **GPU node pools** during model training, ensuring GPU machines were used only when needed.
- **Supervised** and **led** a team of **5-10 interns**, providing mentorship.

Marketing House by Eyula **Antalya, Türkiye**
Intern January 2023 - April 2023

- Built a **pipeline for daily, weekly, and monthly data extraction** from the **Meta Marketing Insights API**, ensuring data accuracy and integrity, and implemented data storage in **MySQL**.
- Created a **Flask API** for comprehensive **marketing analytics**, providing access to key metrics like cost per action, cost per click, conversions, and click-through rates.
- Designed an interactive dashboard with **Bootstrap** and **JavaScript** to **visualize** key performance indicators and critical statistics.

EDUCATION

Dokuz Eylül University **Izmir, Türkiye**
BS Management Information Systems GPA: 2.67/4.0

- Being a **volunteer** in Toplum Gönüllüleri Vakfı
- Working as a lifeguard in New Hampshire, US as part of the **Work & Travel** program.
- Studying for one semester in Poland as part of the **Erasmus+** program.
- Doing an **internship** in Barcelona Spain as part of the **Erasmus+** traineeship program.

West Pomeranian University of Technology **Szczecin, Poland**
BS Computer Science & Economics GPA: 3.19/4.0

- Erasmus+
