KIVANÇ ADIGÜZEL

OBJECTIVE

Software Development, Data Science, Artificial Intelligence, Machine Learning

EDUCATION

- 2024 - 2025: Kyushu University (Research Project)
- 2019 - 2024: Gazi University, Bachelor's Degree in Computer Engineering
- 2014 - 2018: Beşiktaş Atatürk Anatolian High School

WORK EXPERIENCE

SOFTECH | Junior Software Engineer | Istanbul/Ankara | July 2022 – February 2023

- Developed programs using C# and .NET within the Card Payment Systems team
- Participated in Machine Learning training sessions
- Gained foundational knowledge of NoSQL/SQL databases and Kafka/SPARK
- Conducted tests using PL/SQL
- Supported team presentations and preparation tasks

TURKCELL | FinTech Program | Istanbul/Ankara | April 2023 – June 2023

- Learned the fundamentals of FinTech and its role in the financial sector
- Studied payment systems and their operational processes in detail

CYBERWISE-CODETHREAT | Intern | Istanbul | July 2023 – August 2023

- Researched the impact of Artificial Intelligence on cybersecurity
- Conducted basic case studies and analysis

MIUUL | Short-term Bootcamp | Istanbul | July 2023 – August 2023

- Completed modules on Python programming for Data Science, Feature Engineering, and Machine Learning

QNB Finansbank | Intern | Istanbul | August 2024 – September 2025

- Completed Finance 101 and Banking Fundamentals training
- Participated in regular meetings and Q&A sessions with various bank teams

TECHNICAL SKILLS

- **Programming Languages:** Python (Pandas, Matplotlib, Seaborn, PyTorch, TensorFlow), C, C++, C# (.NET), Java (Springboot), SQL

OPERATING SYSTEMS

Windows, Linux

DATABASES

Oracle, MongoDB

REPORTING TOOLS

MS Office, Power BI

OTHER SKILLS

ELK Stack, Prometheus, Grafana, Object-Oriented Programming (OOP), CI/CD, Docker, Kubernetes

LANGUAGES

- English (Fluent)
- French (Beginner-Intermediate)
- Japanese (Beginner-Intermediate)

PROJECTS

Kyushu University – Research Project

- Developed Python-based seasonal demand forecasting models and market segmentation for the JEPX electricity market
- Achieved high accuracy using LSTM
- Classified demand profiles with K-Means, GMM, and DBSCAN
- Optimized models using Optuna and GridSearchCV, validated with RMSE, MAE, MAPE, SMAPE, and R^2 metrics
- Created interactive visualizations using Power BI and other tools

COURSES / TRAINING / SEMINARS

- IELTS Academic (6.5)
- Stanford Online: Unsupervised Learning, Recommender Systems, Reinforcement Learning (DeepLearning.AI)
- NVIDIA Fundamentals of Deep Learning
- Miuul Machine Learning Summer Camp
- Global AI Hub Python
- Presidency of Digital Transformation Office: Machine Learning
- Presidency of Digital Transformation Office: Deep Learning

REFERENCES

- Hakan Güney (Softtech) | +90 532 672 5607
- Prof. Dr. Şeref Sağıroğlu (Gazi University) | ss@gazi.edu.tr
- Prof. Hooman Farzaneh (Kyushu University) | farzaneh.hooman.961@m.kyushu-u.ac.jp

COMMUNITY INVOLVEMENT & VOLUNTEERING

- Participated in Gazi Cyber Security Club and Gazi Artificial Intelligence Club throughout undergraduate studies, supporting events and activities
- Volunteered at Kyushu University Foreign Students Association (KUFSA), supporting international student events and networking activities
- Taught basic English to young children through interactive activities, contributing to early language development and cultural learning
- Played a key role in establishing the Kyushu University Turkish Community
- Collaborated with J-MENA Office to facilitate cultural exchange and academic cooperation
