A. Faruk Topkaya
Computer Engineer

Personal info

afaruk96@hotmail.com | +90 544 627 47 82 | Sultanbeyli, İstanbul
LinkedIn Profile | GitHub Profile

Education

B.Sc. degree | Computer Engineering - **Maltepe University (En)**

Experience

Intern, **İsdo Yazılım**, İstanbul, *Jan 2024 – Feb 2024*

- Gained experience in web development and SEO.
- Worked on **WordPress**, **JavaScript**, Frontend, and Backend development processes.

R&D Assistant , **Spectre Robotics Endüstriyel Otomasyon Aş.**, İstanbul, *May 2021 - Jan 2024*

- Optimized the system to streamline office workflows and improve productivity.
- Worked on embedded systems to ensure hardware and software integration.
- Worked on electronic systems and **PCB** design.
- Developed projects using **Python** and **Linux** system administration.
- Actively contributed to digital electronic devices and manufacturing processes.

Projects

Drilling Site Occupational Safety Automation (Spectre Robotics)

- Participated in an automation project developed to enhance occupational safety in drilling sites.
- Integrated hardware and software to optimize safety processes.
- This project has been completed and is **currently used by a public institution.**

Electronic and Software Support for Electric Vehicles (Spectre Robotics)

- Provided electronic and software support to a company developing electric vehicles.
- Contributed to vehicle hardware and control software development.
- This project has been completed and is **currently used by a public institution.**

Smart LPG Carousel System (Spectre Robotics)

- Worked on the development of a smart carousel system optimizing LPG filling processes.
- Provided electronic and software support to enhance system automation.
- The products developed in this project are **used by leading companies in the industry.**

Straw Packaging Machine (Spectre Robotics)

- Participated in a project to develop a machine automating straw packaging.
- Contributed to **machine automation** and software development processes.
- This project, which increased production efficiency, was successfully completed.

Skills

Programming Languages: JavaScript, Java, C/C++, Python, SQL, HTML, CSS
Frameworks & Tools: React Native, Visual Studio, IntelliJ IDEA, SQL Server, SQLlite, MySQL,
Platforms & Operating Systems: Linux, Windows, MacOS, Embedded Linux
Core Competencies: Software Development, Database Design, Git, Cross-Platform Testing.
PCB and Electronics: PCB Design, Electrical Wiring, Manufacturing Operations
Others: AutoCAD (2D, 3D), WordPress, Photoshop, SEO (Search Engine Optimization)

Languages

Turkish: Native
English: Intermediate

Others

Drive license (B)
