EDUCATİON

- Ankara University, Turkey (2019 / 2025)

BSc. Degree in Geophysical Engineering
GPA 2.85

- Koeln University, Germany (03/2022 - 09/2022)

Mathematical and Earth Sciences - Erasmus Exchange Program

- Doğa High School College (09/2016 - 06/2018)

WORK EXPERİENCE

Ai-Ads Specialist at Enhencer Ai-Ads / Meta & Google

Started at Enhencer, a fast-growing startup, and transitioned into ads specialization. Currently working on AI-powered advertising optimization, managing campaigns on Google Ads and Meta Ads. Focused on improving targeting and performance through data-driven strategies, reducing CPC, increasing ROAS, and running A/B tests to optimize creatives and audiences.

Project Management Intern at TNC Group (05/2025 - 07/2025)

- Completed a five week internship a TNC Group, contributing to projects focused on digital strategy, legal informatics and data analysis.
- Project and Organizational Management

Supporting planing, execution and coordination of ongoing projects.

- Data Analysis

Interpreting datasets and contributing to performance and progress reporting.

- Legal Informatics

Learning about digital legal frameworks, information security and privacy compliance.

Information Technologies Intern at SCA Office (06/2025 - 08/2025)

- Currently undertaking an IT internship at SCA Office, focusing on design and development tools. Actively learning and applying skills in Photoshop, AutoCAD, Python through hands-on tasks and projects.

Internship at MTA (07/2023 - 08/2023)

- A 40-Day internship was completed at the General Directorate of Mineral Research and Exploration (MTA), where geophysical research methods learned and applied.
- Throughout this process, technical knowledge and experience in data collection, processing, analysis, and interpretation were gained.

GRADUATİON THESIS

A system based on Arduino was developed to measure and visualize the time-dependent variations of voltage values obtained during Magnetotelluric (MT) measurements. This system processes the data collected by Arduino using C# and presents it through a designed computer interface. The data obtained using two different types of electrodes were analyzed, and more stable measurements were achieved with lead-lead chloride electrodes.

SKILLS

Python
MatLAB
MS Office
AutoCAD - Beginner
Microsoft Excel - Intermediate
Google & Meta Ads
Performance Analysis

INTEREST

Designing Sound Effect
Piano and Vocal
Ice Skating
Travelling

LANGUAGES

Turkish (Native)
English (B2)
German (A2)
