Hamza Uğur Sakarya

Engineer

Turkey • Whatsapp(+90553 926 76 48) •uguur.sakarya@outlook.com

• **LinkedIn** • **GitHub**

Mechanical Engineering graduate with hands-on experience in **analytics workflows, including data extraction, transformation, and visualization**. Proficient in Python, SQL, and cloud-based tools, with a solid understanding of infrastructure and data pipelines.

CORE COMPETENCIES AND INTERESTS

Data Analysis & Cloud Skills:
Certified in AWS Cloud Solutions Architect and Cloud Practitioner. Experienced in using cloud platforms (AWS, GCP, Azure) to build scalable data pipelines, automate data workflows, and manage storage and compute resources for analytics.

Analytical Problem Solving:
Experienced in analyzing complex datasets to extract actionable insights and support business decisions. Skilled in identifying data quality issues, uncovering trends, and performing exploratory data analysis (EDA) using Python and SQL. Familiar with designing KPIs and creating data validation checks to ensure data accuracy and integrity.

Programming & Automation:
Strong Python and SQL skills for data wrangling, ETL, reporting, and automation. Comfortable using libraries such as Pandas, NumPy, and Matplotlib. Also experienced in scripting with Bash.

Language: Fluent in English and Native in Turkish.

PROFESSIONAL EXPERIENCE

CW Energy - Research Engineer 2023 - Present

Responsible for solar cell metallization design and preparing products for manufacturing. Setting up data pipelines and metrics. Setting up Power BI dashboards. Analysis with several tools like SQL. Capable of making effective decisions and leading teams efficiently under high-stress conditions. Experience with ISO 9001 and documentation

Interreg Next Med European Project Second Call Proposal - Evaluation ongoing

This project focuses on implementing renewable energy on agricultural land to address climate change in the Mediterranean. Project partners across the Mediterranean are 5 different institutes in Italy, Morocco, Algeria, and Turkey. I am responsible for coordinating with local partners as the applicant's technical support to the project coordinator and preparing documentation for local policymakers regarding the project.

Data internship at MEFA Group (40 days) / Eskisehir

I worked as an intern data engineer at the Styrofoam-producing department and tried to optimize section process automation, collect the parameter data, and set up the database. Applied data visualizations and linearization methods, and made a presentation to the section manager about future actions.

Python Data Visualization Projects

I was preparing a Data visualization that took data from Kaggle. I have experience working with different types of datasets and correlations. I prepare most of the visualizatıon based on the ML statistical thinking type. GithubLink

PROFESSIONAL CERTIFICATIONS

AWS Cloud Practitioner
Dated AWS Solutions Architect Associate
DataCamp - Data Analyst with Python DataCamp
Udemy - Deep Learning Python

EDUCATION AND TRAINING

Eskisehir Osmangazi University, College of Engineering, Eskisehir, TR– Graduate of Mechanical Engineering
