Education

Istanbul Aydin University — Sep 2021 – Jun 2025
Bachelor in Computer Engineering — *Istanbul, Turkey*

University of Trento — Sep 2023 – Feb 2024
Erasmus+ Exchange Program - Information Engineering & ICT — *Trento, Italy*

John von Neumann University — Feb 2023 – Jun 2023
Erasmus+ Exchange Program - Computer Engineering — *Kecskemet, Hungary*

Technical Skills

Programming Languages: Python, SQL, HTML, CSS, TypeScript
Libraries & ML Tools: pandas, NumPy, scikit-learn, StatsModels, YOLOv8, TensorFlow, Seaborn, Matplotlib
Frameworks & Platforms: React, Supabase, FastAPI
Tools & Technologies: Jupyter Notebooks, Git, VS Code, Power BI, Google Looker Studio, Docker
Core Expertise: Machine Learning, Deep Learning, Forecasting Models (LSTM, ARIMA, Prophet), Data Visualization, End-to-End Deployment, Business Development

Experience

NATO Science for Peace and Security (SPS) Program — Jun 2024 – Jun 2025
Research Assistant Intern | Recommendation | GitHub — *Istanbul, Turkey (On-Site)*

- Processed satellite data: data cleaning, normalization, modeling.
- Forecasted Sea Surface Temperature in the Mediterranean using LSTM, Prophet, ARIMA (98.9% accuracy).
- Contributed to climate-related decision support through big data pipelines.
- Presented results of research and research cases at International Conferences and NATO meetings.

WorldQuant — Jan 2025 – Mar 2025
Data Science Fellow | Credly | GitHub — *Washington, D.C., USA (Remote)*

- Completed 8 real-world data science projects, mastering DBM, ETL pipelines, ML modeling, and EDA.
- Developed 6+ machine learning and neural networks in Python, with regression and classification tasks.
- Extracted and transformed messy data from SQL and NoSQL databases, ensuring high-quality training sets.
- Designed compelling visualizations using Matplotlib, Seaborn, and Tableau to communicate complex data insights.

AI Projects

Order@ | Supabase, Eleven Labs, GraphQL, React, TypeScript | Published SaaS — May 2025 – Present

- Designed and executed the full architecture of a multilingual SaaS platform to streamline family business.
- Accelerated development by leveraging Vibe Coding to streamline code generation and workflow automation.
- Built interactive data dashboards using Supabase and integrated APIs to provide real-time analytics.

Dental Anomaly Detection via Biomedical X-rays | Deep Learning, YOLO — Sep 2024 – Jun 2025

- Used 1k+ dataset, YOLOv8, F1 Score and mAP50 to evaluate accuracy of predicting.
- Applied Image Processing techniques including CLAHE and resizing to improve image detection.
- Deployed a full-stack AI solution for clinics, featuring automated image detection and delivery via accessible user interface. [Presentation]

Publications

Comparing Model Results for Predicting Temporal Variations of SST and Rainfall Rate — 11th Atmospheric Sciences Symposium, 2024.
Omar Sawalha, A. Dwikat, S. Mola, N. Ahmed, M. Yeter, Z. Aslan. e-ISBN: 978-975-561-738-1, İTÜ Publishing, No: 2025.2/14, pp. 286–297. [Presentation Video]

Soft Skills & Languages

Soft Skills: Exposure, Leadership, Curiosity, Teamwork, Creativity

Languages: Arabic (Native), English (C1), Turkish (B2), French (A2)
