Abdulkadir Yavuzakıncı

## PROFILE

I have a strong passion for continuously pursuing new technologies. I am currently focusing on machine learning, deep learning and data science, conducting research and projects in these areas. My career goals include advancing to leadership positions in AI and taking part in projects that influence developments in the industry.

## PROFESSIONAL EXPERIENCE

08/2022 – 09/2022

**REM People**
AI Developer Intern
An internship period where I received training in areas such as Machine Learning, Deep Learning, Image Processing, Data Analysis and had the opportunity to apply them in a project. It is a period in which I provided teamwork, communication skills with the team, practical experience in professional life and an important personal development in the field of artificial intelligence.

08/2023 – 09/2023

**SİLİKON AKADEMİ**
Data Analyst Intern
I strengthened my ability to understand and interpret data by working with SQL and statistical data analysis skills. In this process, I gained experience in making data-driven decisions using tools such as data analysis, business intelligence and SSIS. I also gained important experiences such as teamwork, team communication skills and practical involvement in professional life.

09/2023 – 01/2024

**BAYKAR TECHNOLOGIES**
Artificial Intelligence Intern
During my internship, I worked in the fields of artificial intelligence, computer vision and data analytics. Through hands-on experiences, I honed my skills in leveraging cutting-edge technologies to develop innovative solutions. I actively contributed to projects that required a keen understanding of AI algorithms, computer vision applications and proficient data analytics techniques. This internship not only deepened my technical expertise, but also instilled in me a passion for pushing the boundaries of what is possible in the rapidly evolving landscape of AI and related disciplines.

05/2024 – 10/2024

**Diatics**
Artificial Intelligence Intern
During my internship in artificial intelligence, I gained hands-on experience in various aspects of computer vision, including image processing, data augmentation, and developing a labeling tool for pose estimation. I also engaged in reading and analyzing recent research papers, performing feature scaling, and training machine learning models. Additionally, I worked with Docker and Linux systems, conducted GPU-CPU performance tests, and contributed to shadow detection tasks. These experiences have strengthened my skills in AI and computer vision techniques.

04/2025 – Present
Istanbul/Turkey

**Diatics**
AI Engineer
As an Artificial Intelligence Engineer, I have experience working on projects involving computer vision, LLM, Data analysis and science, Image Processing and 3D Vision.

## EDUCATION

2020 – 2024

**DOĞUŞ UNIVERSITY**
Software Engineer

## SKILLS

- Python
- C++
- SQL
- Java
- HTML
- CSS
- Linux
- CUDA

## LANGUAGES

English

## REFERENCES

**Mustafa Zahid Gürbüz**, *Doğuş University Dr. Lecturer,* Doğuş University
zgurbuz@dogus.edu.tr

**Tuğçe Keskin**, *Computer Engineer,* Baykar Technologies
(+90) 534 692 01 54

## PROJECTS

**Brain Tumor Segmentation Application**
An application of an artificial intelligence model that detects the tumourous region in brain MRI images using Vision Transformer (VIT).

**Sign Language Application**
An artificial intelligence application that transcribes the classes detected from the camera in real time, creates meaningful sentences with these transcribed words, transcribes them into text and translates them into audio.

**Gaming Website**
A gaming website where you can play HTML5 games directly on the web.

**Blog Website**
Personal blog page. Here you can publish your content and edit it dynamically.

**Pose Estimation Labeling Tool**
A labeling tool with which we can label and edit the human class for the pose estimation task.

## COMPETITION

| | |
|---|---|
| 2022 | **Teknofest Ulaşımda Yapay Zeka Competition** |
| 2024 | **Teknofest Silahlı İnsansız Hava Aracı Competition** |

## CERTIFICATES

- Machine Learning Specialization
- Deep Learning Specialization
- MLOps
- Generative AI with LLM
