

BUĞRAHAN CAN

R&D Component Development Leader

PROFILE INFORMATION

Date of Birth: 16.04.1997

Address: Bursa/Türkiye

Military service: Completed

CONTACT

Phone: +90 541 596 86 79

E-Mail: bugrahan.can97@gmail.com

LinkedIn: linkedin.com/in/buğrahan-can-141b2a18b/

ABOUT ME

A motivated Electrical and Electronics Engineer with expertise in automotive component development, quality assurance, and supplier collaboration. Skilled in managing projects from design to production, with strong knowledge of APQP principles, testing methodologies, and cross-functional teamwork. Proficient in MATLAB, Python, and diagnostic tools, with proven ability to support technical development and contribute to supplier evaluations to ensure compliance and cost efficiency.

LANGUAGES

Turkish (Native)

English (Advanced)

German (Intermediate)

WORK EXPERIENCE

TOFAS TURK OTOMOBIL FABRIKASI A.S.
Component Development Leader
May 2023 - Present

- Held global responsibility for the end-to-end development of mechatronic components for Jeep, Alfa Romeo, Maserati, and Tofaş models, managing all stages from design to production.
- Conducted diagnostic and validation activities with suppliers, ensuring compliance with Stellantis standards and ISO 26262 functional safety principles.
- Utilized CAN/LIN bus communication tools for system validation, diagnostics, and troubleshooting.
- Tracked and resolved software and hardware issues during verification tests, securing error-free approvals before production release.
- Collaborated with global cross-functional teams to align requirements and keep technical specifications accurate and updated.
- Supervised product documentation, error tracking, and release management, applying project management skills to achieve milestones and organizing task force activities to address risks and resolve technical challenges.
- Contributed to Kaizen continuous improvement initiatives, identifying efficiency opportunities in component development processes.

Key Components in Scope:

- Sensors & Modules: Humidity Rain/Light Sensor, Steering Column Control Module
- Climate Systems: Auto and Manual Climate Control Modules
- Safety & Security: Electronic & Mechanical Steering Column Lock, Horn, AVAS (Acoustic Vehicle Alerting System)
- Electrical Systems: 12V/Lighter Outlet

ENERJISA BASKENT ELECTRICITY DISTRIBUTION INC.
Intern
Aug 2019 - Sept 2019

- Had the opportunity to work and observe in different departments such as SCADA center and Grid Management.
- Observed field activities with the Relay Coordination team, learning about protection systems and network reliability.
- Collaborated with engineers and attended transformer maintenance training, building awareness of preventive maintenance practices**.**

DEDEM MEKATRONIK LTD.
Intern
Jan 2019 - Feb 2019

- Assisted in the production of electrical panels and gained hands-on exposure to industrial automation components.
- Contributed to the development of a control panel for a wet wipe machine, programming basic PLC commands.
- Applied TIA Portal and Lasal Class software in automation tasks, improving understanding of control systems.

TECHNICAL SKILLS

- CANalyzer / DIANalyzer / Candela
- Catia V6 / Siemens NX
- PLM Systems
- MS Excel
- Python
- MATLAB
- Powerpoint

PROFESSIONAL INTERESTS

Automotive Electronics

Vehicle Network Systems

Renewable Energy

Digitalization in Manufacturing

Digital Image Processing

SOFT SKILLS

Problem Solving

Analytical Thinking

Teamwork & Collaboration

Quick Learner

HOBBIES

Photography

Playing Guitar

Travel & Cultural Exploration

EDUCATION

IZMIR UNIVERSITY OF ECONOMICS
Bachelor of Science in Electrical and Electronics Engineering
Aug 2015 - Mar 2021

- Instruction language: 100% English
- Activities: IEEE IEU, IEU Musicians Club, IEU EKODAK Mountaineering and Trekking Club

KÜÇÜKYALI REZAN HAS ANADOLU LİSESİ
Science & Mathematics Branch
Sept 2011 - Jun 2015

CERTIFICATIONS

GOETHE INSTITUT GERMAN LANGUAGE COURSE
B1.3 Level
Oct 2024 - Present

IELTS
Band Score 7.0
Dec 2024 - Dec 2026

IZMIR UNIVERSITY OF ECONOMICS
Software and Coding Sertificate Program
Aug 2022 - Dec 2022

- Topics: Programming (Java, Python), Web Design (HTML, CSS, PHP, JS, SQL)

TECHCAREER.NET
Data Science Bootcamp
Jun 2022

- Data Science fundamentals, Machine Learning, Python
- Credential ID: 65328401798819

PROJECTS

DEEP LEARNING BASED MELANOMA DETECTION
Graduation Project

The main purpose of the project was to facilitate the detection and classification of merlanoma from dermoscopic images by using deep learning methods.

- Developed a related algorithm on MATLAB.
- Tested the algorithm on different images.
- Optimised the algorithm for better performance.

WIDEBAND RF HARVESTER ANTENNA DESIGN
Term Project

Aim of this project was to design and simulate a microstrip patch antenna that operates from 1 GHz up to 5 GHz for RF Harvesting.

- Developed and simulated the antenna characteristic on CST.
- Tested the transmission of the signal output from the modem to the phone with the help of the antenna through different Wi-Fi channels.
