Ali Emre Gülpınar , Junior AI & Data Engineer

aliemre.gulpinar1@gmail.com , +905309374127 , https://www.linkedin.com/in/aliemregulpinar/ , Izmir/Turkey

PROFILE

I am a Computer Science graduate from Dokuz Eylül University with hands-on experience in artificial intelligence, computer vision, and project management. My technical journey began with the DEU ROV Team, where I worked on an autonomous underwater vehicle presented at TEKNOFEST.I completed an AI Research Internship at **HUAWEI**, contributing to real-world projects in image processing and artificial intelligence. Later, I joined **SCA Social** as a Project Management Intern, gaining practical experience in Agile workflows and data privacy.
Most recently, I served as the project coordinator and co-developer of a **TÜBİTAK-funded graduation project** focused on predictive maintenance using vibration data.

EMPLOYMENT HISTORY

Project Management Intern
SCA Social, Istanbul, Türkiye
February 2025 – March 2025

-Gained hands-on experience with Agile/Scrum methodologies and project lifecycle management.

-Used task tracking tools for sprint planning and team coordination.

-Gained awareness of data privacy, GDPR compliance, and IT Law fundamentals.

Certificate :
https://drive.google.com/file/d/171KMFxjMR98YXJgDMrSaCWW25Jtp_f40/view?usp=sharing

Artificial Intelligence Research Intern
Huawei R&D Center, Istanbul, Türkiye
July 2024 – September 2024

-Successfully completed a 32-day mandatory internship in the AI department.

-Worked on deep learning, image processing, dataset preparation, and model training.

-Developed an ID image parser that extracts personal information using computer vision techniques.

Software Developer – Image Processing
DEU ROV Team, Izmir, Türkiye
October 2022 – October 2023

-Contributed to the development of an autonomous underwater vehicle for TEKNOFEST.

-Focused on image processing using Python and OpenCV.

Helped design and improve vision-based navigation and object detection features.

EDUCATION

Aug 2021 – Aug 2025 Bachelor's Degree in **Computer Science** , DOKUZ EYLUL UNIVERSITY (Avarge: 2.81 / 4.00)

Aug 2020 – Aug 2021 English Preparatory Program DOKUZ EYLUL UNIVERSITY (Avarge: 83/100)

SKILLS

Programming: Python (Advanced), C (Basic) , C# (Basic)

Technologies: OpenCV, Scikit-learn, TensorFlow, Pandas, Matplotlib, Git, Power Query , Power Pivot , Power BI

AI & ML: Machine Learning, Deep Learning, Computer Vision, Data Preprocessing, Data Analyst

Project Management: Agile, Scrum, Jira

Soft Skills: Team Leader, Team Collaboration, Problem Solving

LANGUAGES

English: Intermediate (B1) – Actively improving

PROJECTS

Graduation Project – AI-Based Fault Detection System
TÜBİTAK 2209-A Funded & The project was awarded the 1st prize by the Computer Science Department

GitHub: https://github.com/aliemregulpinar/fault_detection_vibration

- Developed a fault classification system using vibration signals from rotating machinery.
- Applied time series segmentation and feature engineering (mean, std, rms, kurtosis, etc.).
- Used STFT and t-SNE for signal visualization and separability analysis.
- Implemented classification using classical ML models (Random Forest, XGBoost, SVM, KNN) and deep learning (Dense Neural Network, ResNet-50, CNN).
- Built a PySide6-based AI-supported desktop application for data upload, visualization, and inference.
- Project was awarded **1st place among all senior design projects in the department.**

  Certificate;
  https://drive.google.com/file/d/1VTRCwDRU7Hw_bQ7kk9Uvrp5fDNHhqu4M/view?usp=sharing

Technologies Used:
Python, Scikit-learn, TensorFlow, Keras, PySide6, Pandas, NumPy, Matplotlib, STFT, t-SNE, GridSearchCV

Used Car Price Prediction App

GitHub: github.com/aliemregulpinar/Car-Price-Prediction

- Built a desktop app using Python's Tkinter to estimate used car prices.
- Cleaned and preprocessed a real dataset from Kaggle.
- Trained and compared models: Linear Regression, Ridge, Lasso, Decision Tree, Random Forest.
- Final model (Random Forest) used in the deployed application.
