+905399481196
Istanbul/Turkey

RELEVANT SKILLS

- Robotics
- Mechatronics
- Simulation Systems
- Automation
- ABB RobotStudio - RAPID Programming
- MATLAB/Simulink
- Microsoft Office 365
- Arduino Programming
- Beckhoff TwinCAT PLC
- AutoCAD
- CATIA
- SolidWorks
- Python
- ExtendSim
- Siemens Tecnomatix Plant Simulation
- Canva
- Driving license – B type

WORK EXPERIENCE

Ford Otosan

Vehicle Operations Manufacturing Engineering End of Line Test Team Member | July 2024 – Present

- Ensure production readiness at targeted quality, cost, and time
- Install and manage EOL test equipment
- Perform test tryouts and resolve issues
- Coordinate with manufacturing departments
- Manage EOL issue resolution and reporting
- SCCAF, PFMEA, Control Plan
- Diagnostic Engineering Tool and Launch Procedures
- Purchasing process (Capex)

Arzum Household Electrical Appliances

Overseas Service Specialist | April 2024 – June 2024

- Ensure exceptional service for Global customers
- Manage service needs across various time zones and regions
- Deliver seamless solutions to diverse clientele worldwide
- Adaptability and resilience
- Keen eye for detail
- Proactive initiative

AKE Elevator,Escalator and Accessible Systems

Intern Engineer | August 2020 – November 2020

- Collaborated with the Research and Development (R&D) team
- Generated new project ideas aligned with company goals
- Learned about the operation of elevators, including complex parts and mechanisms
- Applied theoretical knowledge to Real-World scenarios
- Enhanced problem-solving skills
- Fostered creativity in generating innovative ideas

I-MAK Reducer

Intern Engineer | August 2019 – September 2019

- Used SolidWorks software to design industrial reducers
- Participated in the entire manufacturing process, including assembly, testing, and quality control
- Gained understanding of the complexity involved in producing industrial reducers
- Developed skills in design, manufacturing, and problem-solving

Alanya Cable Car Company

Intern | January 2019 – January 2019

- Learned about the maintenance and operational mechanisms of cable cars
- Worked with experienced professionals
- Gained practical knowledge of cable car operations, safety protocols, and maintenance practices
- Developed essential skills for a career in the transportation industry

LANGUAGE SKILLS

- Turkish - Native Language
- English - Professional Level
- German - Beginner Level
- Swedish - Beginner Level

OTHER ASSOCIATIONS

AIESEC Global Volunteer

Teacher Assistant | 2018

As a teacher assistant in AIESEC organisation, I was helping the main teacher for mathematics, english and science lessons for the students between 7-12 years old in Romania.

Bahcesehir University IEEE

Board Member | 2016 – 2019

As a board member of IEEE student organisation, I was responsible for the robotic competitions and factory visits like Mercedes-Benz and Bosch.

HOBBIES

- Analogue Photography
- Stand Up Paddle Boarding

EDUCATION HISTORY

University West

Robotics and Automation | August 2022 – June 2023

Robotics and Automation Master´s Degree 60 credits
Trollhättan/Sweden

Bahcesehir University

Mechatronics Engineering | August 2015 – March 2021

Mechatronics Engineering Bachelor´s Degree 130 credits
Istanbul/Turkey

ACADEMIC WORK

Master Thesis Work

Discrete Event Simulation of Sawmill Process | Södra - University West

This thesis work develops a simulation model using Discrete Event Simulation (DES) to improve efficiency in a Sawmill. The model identifies bottlenecks, reduces lead times, and optimizes inventory levels. Accurate data collection and simplifications are emphasized, and the ExtendSim software is used for modeling. The report highlights DES as a tool for informed decision-making, leading to enhanced productivity and competitiveness in the Sawmill industry.
