PERSONAL INFORMATION

Date of Birth : 04.04.1996
Nationality : Turkey
Marital Status : Single
Driving Licence : B Class, 2015

Characteristics : Creative, self-confident, realistic, energetic, calm, careful, good-humoured.

Fields of Interest: Science and technology, music, movie.

OBJECTIVE

I am a newly graduated of Electrical and Electronics Engineering at Kadir Has University. During my education, I took communication and telecommunication courses. However ,as a new graduate engineer candidate, I am open to all positions related to my department. I have now done 1 internship in my university life and will complete my internship in July. I did my internship in İstanbul Energy A.Ş as a project and business development trainee. In this internship, the installation stages of the solar power plants are required. I also learned the installation stages of the wind turbines. My second internship is continue now in Mikro-p Electronics A.Ş. at İTÜ Arıkent. Until this time I learned printed circuit board(PCB) design. I am also an active scholarship student at the Directorate of Financial Affairs at Kadir Has University. I work as an intern in student accounting. Also, I have attendance certification about UITSEC cyber security training. As a university graduation project, we design gloves for the hearing impaired, which translate sign language into writing and sound. We will develop this graduation project with artificial neural networks, deep learning, long short term memory and processors. Our Project was chosen the "Best Design Project" in our university. Also, our project was supported by TÜBİTAK 2209-A University Student' domestic research projects Support Program. Finally, I completed an academic period of my educational life in Poznan University of Technology University in Poznan, Poland as part of a student exchange program. Thanks to this experience, I have improved my English and learned how to adapt in multinational environments. During and after the my education life, I always interested to machine learning algorithms. I attended the course about the Artificial Intelligence with Python. I will finish at the end of January 2020. I learned machine learning algorithms such as numpy, pandas, scikit-learn, k-NN, naïve bayes, decision tree, support vector, supervised learning and unsupervised learning.

WORK EXPERIENCE

20 Aug – 1 Feb 2019 **General Coordinator IoT Vision BilişimA.Ş**

Department of Electronics & IT,İstanbul

Responsibilities:

- Understanding IoT world
- Coordination of R&D
- Electronic design

2019 **Internship Mikro-p Electronics A.Ş. İTÜ Arıkent**

Department of Electronics, İstanbul.

Responsibilities:

- Analyze electronic components' data sheets.

- Create electronic components library.
- Create electronic components schema.

2017-2019 **Asistant of Kadir Has University**

Department of Financial Office, İstanbul.

Responsibilities:

- Student account.
- Edit student documents.
- Create payment plan to students at registration time.

2017 **5th IEEE International BlackSea Conference on Communication and Networking**

Responsibilities:

- Welcoming presenters at the airport.
- Name badge creation.
- Computer, microphone settings for presentation.

2017 **Internship İstanbul Energy A.Ş.**

Department of Project Development , İstanbul.

Responsibilities:

- Optimization of electric vehicles.
- Researching solar systems around the world.
- Technical tour.

EDUCATION

2020 – 2022 **Kadir Has University,** Istanbul, Turkey.
Department of Electronics Engineering
M.Sc. in Electronics Engineering

2019 **Yazılım24,** İstanbul, Turkey.
Python and Machine Learning Course
- Scikit-Learn
- Decision Tree
- K-NN
- Numpy
- Pandas
- Support Vector Machine Learning

2014 – 2019 **Kadir Has University**, Istanbul, Turkey.
Faculty of Engineering and Natural Science
Department of Electrical-Electronics Engineering
BS. in Electrical-Electronics Engineering

2018 **Anadolu University, Eskişehir, Turkey.**
Faculty of Distance Education
Department of Management Information Systems

2017 **Politechnica Poznanska, Poznan, Poland.**

Faculty of Telecommunication
Departmen of Telecommunication Engineering
Erasmus Student

2010 – 2014 **Tuna High School,** Istanbul, Turkey.
Department of Math-Science

KNOWLEDGE AND SKILLS

Technical Knowledge:

- Python Programming Language.
- Matlab
- Microsoft Office applications.
- Basic SQL
- Multisim
- Wireshark
- Kali Linux
- Python Machine Learning
- Data science
- LSTM
- RNN

Language skills:

- Native in Turkish.
- Fluent in English.
- Basic in French and Polish.

Personal Skills and Competences:

- Problem solving abilities,
- Team work skills,
- Adaptable,
- Leadership,
- Innovative thinking.

SOCIAL ACTIVITY AND MEMBERSHIP

Institude of Engineers and Everyone Else Society(IEEE),Kadir Has University(President of ComSoc)

ESN Kadir Has University (Erasmus Student Network)

Engineering Competitions(Content Development)

Social Solidarity and Support Club Volunteer in Engineering Competitions.

SCHOLARSHIP AND AWARDS

Our final project has been awarded support scholarship within the scope of TÜBİTAK 2209-A University Student' domestic research projects Support Program.

Our final project chosen "Best Design Project" at Kadir Has University.

Our final project has the right to attend and make a presentation the 10th ICoSReSSE Conference on 17-18 June at Rome,Italy.
